

DANIEL MUTHIRU NJAMA

FULL STACK DEVELOPER | React · Vue · TypeScript · Node.js · Python · PostgreSQL · Cloud

(+48) 576-823-630 • njamadaniel3@gmail.com • [LinkedIn](#) • [GitHub](#) • [Portfolio](#)

PROFILE

Full Stack Developer with production experience building and shipping web applications end to end, from responsive React/Vue interfaces and TypeScript application logic to backend APIs, databases, authentication, payments and cloud deployment. Promoted from intern to part-time developer at PRIOT Digital Systems based on performance, contributing to a live multi-tenant SaaS platform. Experienced with Node.js, Python, PostgreSQL, Firebase, Supabase, GCP and AI-powered automation.

PROFESSIONAL EXPERIENCE

Full Stack Developer & Business Analyst / Product Contributor (Part-Time) | PRIOT Digital Systems

Jul 2025 – Present • Maribor, Slovenia · Remote

- Promoted from intern to part-time contributor based on performance, taking ownership of features from requirements and acceptance criteria through implementation and delivery on a live multi-tenant SaaS inventory platform.
- Designed and shipped an automated PDF extraction pipeline using the Gemini API and Firestore, reducing manual document-processing time by around 60% while handling hundreds of documents per month.
- Built production authentication and billing flows using Google OAuth 2.0 and Stripe, including server-side routes supporting subscriptions, billing and access control.
- Delivered responsive React.js and Tailwind CSS interfaces across mobile, tablet and desktop, translating stakeholder requirements into production-ready components.
- Contributed to Agile planning, backlog grooming, code reviews, requirements gathering, UAT support and iterative delivery with a cross-functional team.

SELECTED PROJECTS

LiveStocka — Multi-Tenant Livestock Management Platform | Independent Project | github.com/Muthiru/LiveStocka

- Built a full-stack livestock management platform with Nuxt 3, Vue 3, TypeScript, Supabase/PostgreSQL, Row Level Security, Edge Functions and Vercel.
- Designed the product scope and roadmap covering cattle profiles, health records, milk production, breeding detection and genetic lineage tracking.
- Designed a secure multi-tenant PostgreSQL data layer with Row Level Security to isolate farm data and validated access rules through structured testing.
- Implemented OAuth 2.0 and email/password authentication, real-time dashboard functionality and a strongly typed TypeScript codebase.

Volatility 25 Automation System | Independent Project | github.com/Muthiru/hot_dogg

- Built an asynchronous Python automation system using the Deriv WebSocket API, multi-timeframe signal processing and configurable risk controls.
- Implemented live market-data streaming, caching, performance logging and automated email alerts, then deployed the service on GCP for unattended 24/7 operation.

VauLT Store — Secure E-Commerce Payments Platform | Independent Project | secure-ecommerce-payment.vercel.app

- Designed and built a secure e-commerce payments platform using cryptographic tokens to protect checkout transactions without exposing raw card data.
- Deployed the application on Vercel and developed the product interface and presentation around a consistent dark brown and amber-gold visual identity.

Core: Full Stack Development · Frontend Development · Backend Development · REST APIs · WebSockets · Database Design · Authentication · Payment Integration · Cloud Deployment · AI Integration

TECHNICAL SKILLS

Frontend: React.js · Vue.js · Nuxt 3 · TypeScript · JavaScript (ES6+) · Tailwind CSS · HTML5/CSS3

Backend: Node.js · Express.js · REST APIs · WebSockets · Async/Await · Python · Django/Flask

Databases: PostgreSQL · Supabase · Firebase Firestore · MySQL · Row Level Security · NoSQL

Cloud & DevOps: GCP · Firebase · Docker · CI/CD · Git/GitHub · Vercel

Authentication & Payments: Google OAuth 2.0 · Stripe API

AI & Data: Gemini API · TensorFlow · scikit-learn · pandas · NumPy · OpenCV · DeepFace

Languages: TypeScript · JavaScript · Python · Java · C++

EDUCATION

BSc Computer Science | Sep 2023 – Jun 2026

John Paul II Catholic University of Lublin, Poland • Programming & Information Processing • GPA: 4.5/5.0

Relevant coursework: Software Engineering · AI & Machine Learning Fundamentals · Data Analysis · Systems Design · Databases

LANGUAGES

English - Fluent (C1) • Polish - Conversational (B1)
